LONDON
SW19 6AZ

Dwelling type:
Date of assessment:
Date of certificate:
Reference number:
Total floor area:

Top-floor flat
13 October 2009
13 October 2009
9867-2887-6804-0691-
50 m²

This home's performance is rated in terms of the energy use per square metre of floor area, energy efficiency based on fuel costs and environmental impact based on carbon dioxide (CO₂) emissions.

| Energy Efficiency Rating | | | Environmental Impact (CO ₂) Rating | | |
|---|---------|-------------------------|---|---------|-------------------------|
| | Current | Potential | | Current | Potential |
| Very energy efficient - lower running costs | | | Very environmentally friendly - lower CO ₂ emissions | | |
| (92 plus) A | | | (92 plus) A | | |
| (81-91) B | | | (81-91) B | | |
| (69-80) C | | 76 | (69-80) C | | |
| (55-68) D | 62 | | (55-68) D | 61 | 66 |
| (39-54) E | | | (39-54) E | | |
| (21-38) F | | | (21-38) F | | |
| (1-20) G | | | (1-20) G | | |
| Not energy efficient - higher running costs | | | Not environmentally friendly - higher CO ₂ emissions | | |
| England & Wales | | EU Directive 2002/91/EC | England & Wales | | EU Directive 2002/91/EC |

The energy efficiency rating is a measure of the overall efficiency of a home. The higher the rating the more energy efficient the home is and the lower the fuel bills are likely to be.

The environmental impact rating is a measure of a home's impact on the environment in terms of carbon dioxide (CO₂) emissions. The higher the rating the less impact it has on the environment.

Estimated energy use, carbon dioxide (CO₂) emissions and fuel costs of this home

| | Current | Potential |
|--------------------------|---------------------------------|---------------------------------|
| Energy use | 367 kWh/m ² per year | 319 kWh/m ² per year |
| Carbon dioxide emissions | 2.8 tonnes per year | 2.4 tonnes per year |
| Lighting | £57 per year | £29 per year |
| Heating | £261 per year | £201 per year |
| Hot water | £186 per year | £109 per year |

Based on standardised assumptions about occupancy, heating patterns and geographical location, the above table provides an indication of how much it will cost to provide lighting, heating and hot water to this home. The fuel costs only take into account the cost of fuel and not any associated service, maintenance or safety inspection. This certificate has been provided for comparative purposes only and enables one home to be compared with another. Always check the date the certificate was issued, because fuel prices can increase over time and energy saving recommendations will evolve.

To see how this home can achieve its potential rating please see the recommended measures.

This EPC and recommendations report may be given to the Energy Saving Trust to provide you with information on improving your dwellings's energy performance.
