### Use this document to:

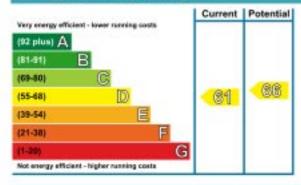

- Compare current ratings of properties to see which properties are more energy efficient
- Find out how you can save energy and money by installing improvement measures

Estimated energy costs of dwelling for 3 years:	£ 2,424
Over 3 years you could save	£ 351

#### Estimated energy costs of this home Current costs Potential costs Potential future savings Lighting £ 144 over 3 years £ 144 over 3 years Heating £ 2,022 over 3 years £ 1,671 over 3 years You could Hot Water £ 258 over 3 years £ 258 over 3 years save £ 351 over 3 years Totals £ 2,424 € 2,073

These figures show how much the average household would spend in this property for heating, lighting and hot water. This excludes energy use for running appliances like TVs, computers and cookers, and any electricity generated by microgeneration.

### Energy Efficiency Rating

The graph shows the current energy efficiency of your home.

The higher the rating the lower your fuel bills are likely to be.

The potential rating shows the effect of undertaking the recommendations on page 3.

The average energy efficiency rating for a dwelling in England and Wales is band D (rating 60).
